Celebrating 25 years of Australian innovations & design

The Designer Grabrail System

strong

rustproof

lightweight

hygienic

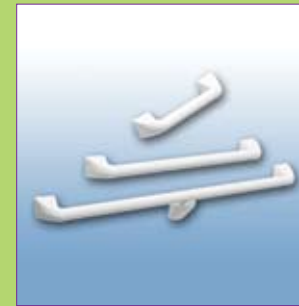

Celebrating over 25 years of grab rail manufacturing, Polymedic is proud to announce the release of our revolutionary new Designer Grab Rail.

In response to consumer demand for a modern, attractive and versatile grab rail, we have developed a patented flangeless bracket – featuring 9 fixing points.

This innovative system offers unprecedented versatility, with each slimline bracket capable of being fastened securely into studs at wall corners.

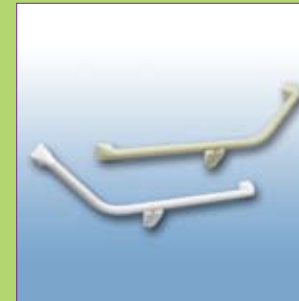

And, like our popular Standard modular grab rail system, the Designer rails meet Australian Standards and are manufactured from lead-free, durable PVC and ABS plastic – right here in Australia.

easy to install
